

# HIGH-FLOW WATER FILTRATION SYSTEM

HANDLES  
**4X**  
THE VOLUME OF  
WATER

The High-Flow innovative water filtration system is an Australian first-designed, developed and manufactured exclusively by Kingspan.

Designed to stop the common issue of overflow flooding or dampness around your tank, the High-Flow Filter is one of the most efficient tank filtration systems on the market.

The High-Flow Filter can manage water flow rates of up to 600 litres per minute\* while still supplying water to the tank and by-passing the excess volume to the storm water management system.

The High-Flow Filter is recommended for:

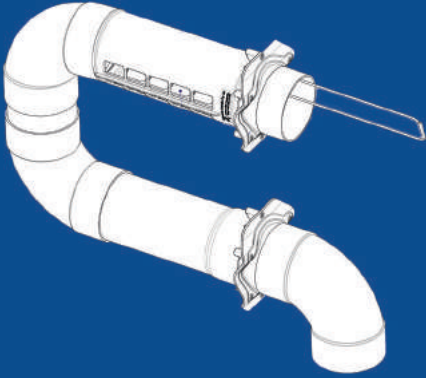

- › Handling large volumes of water collection from severe weather events.
- › New home applications.
- › Charged overflows
- › Retrofitting to existing water tanks, subject to on-site inspections to determine suitability.
- › Tanksalot Water Tanks.

\*approximately 4 times the typical volume capacity of other standard leaf strainers.

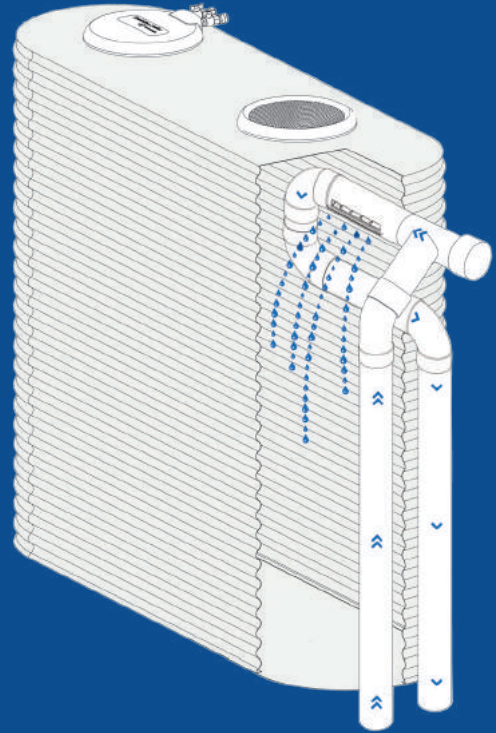

## Features & Benefits

- › Australian first - designed and developed by Kingspan.
- › Australian made.
- › Designed for high efficiency filtration of rainwater.
- › Self cleaning.
- › Continuous filtration.
- › Ability to handle large volumes of water flow per minute.
- › Designed to eliminate risk of overflow and flooding around structural footings.
- › Excess water is bypassed into the storm water system.
- › This filter is placed inside the tank, not exposed to sunlight which eliminates algae build up.
- › Stainless Steel Sediment Control and Mosquito Screen is on the side of the tank making it easier to access the Side Inspection Port and clean.
- › Maximises the potential height of the tank.
- › Appearance of the tank is neater.
- › Smaller footprint - saving on space.

# NEW FILTER TECHNOLOGY THAT WILL DO MORE

High-Flow Filter - designed to reduce overflow flooding.

Filter is inside the tank, not exposed to sunlight therefore eliminating algae build up.

Corrosion Resistant Stainless Steel Mosquito Screen

Neater appearance of Tank with a smaller footprint.

High-Flow Filter is designed to take up to 600 litres\* of water flow per minute.

Corrosion Resistant Stainless Steel Mosquito Screen is located on the side of the tank making it easier to access and clean.

\*approximately 4 times the typical volume capacity of other standard leaf strainers.
